Letter of Reference

To whom it may concern,

This letter is to confirm the successful collaboration between **AuTeBa GmbH** and **Mr. Łukasz Krzesiński** from **MSW-Automatisierung** during several SCADA projects over the past years.

Mr. Krzesiński played a key role in the **development and standardization of our SCADA framework based on Siemens WinCC and WinCC Unified**. His responsibilities included the design and implementation of reusable visualization modules, the definition of project standards, and the integration of modern operation and diagnostic features into our automation environments.

In addition, Mr. Krzesiński regularly conducted **training sessions and workshops for our engineering team**, ensuring a consistent application of the SCADA standards within the company. His extensive expertise in **Rockwell FactoryTalk View** also enabled the **extension of the AuTeBa SCADA standard to Rockwell systems**, allowing us to deliver uniform visualization solutions across multiple automation platforms worldwide.

We particularly value his **technical competence, reliability, and structured way of working**, which have contributed significantly to the success of our SCADA developments. Throughout our collaboration, he provided **high-quality technical support and pragmatic solutions** during the execution of complex automation projects.

We can **highly recommend Mr. Łukasz Krzesiński and MSW-Automatisierung** for demanding SCADA and industrial automation projects.

Sincerely,

Andreas Leder
